

Barb,

We survived another one. The biggest and toughest yet. Paige and I were talking the other day how nice it is to work with the CERT and SVARC. Three years ago when we had our first event we decided to use the shuttle drop system or have everyone come to the start area on day of. It was our only way to guarantee the course was safe and ready. Your team works so well together we decided to try a non-shuttle year. It was great. Outside of assigning locations we didn't need to do anything.

CERT and SVARC is such a well prepared professional group it was nice to let go of this task and focus on the other details of the event. Please let everyone know how much we value their help. If they have any comments or suggestion please let us know; timeline, control locations, etc. I am looking forward to working with you in future events.

Thanks
Dean Vergillo
